TITLE

: CERAMIC THERMAL SPRAYING MATERIAL

ABSTRACT:

PURPOSE: To obtain a ceramic thermal spraying material giving a thermal sprayed film having a fine and fast light brown color by blending specified percentages of MnO2, SiO2

and Al₂O₃.

CONSTITUTION: A ceramic thermal spraying material consisting of 1~20wt% MnO₂, 10~30wt% SiO2 and 50~80wt% Al2O3 is prepd. When the thermal spraying material is used, a thermal sprayed film having a light brown color as well as satisfactory hardness, toughness and wear resistance is formed on a base material such as a building material

without damaging the base material.
